## NewsSplash

June 2016 Edition

### Firing on all cylinders

For most people, having your car serviced regularly by an expert is second nature. You want to keep your car in tip top condition, right?

Well the same goes for your swimming pool. While it is easy to look after your swimming pool if you have the adequate tools, equipment and basic knowledge of water chemistry, the bigger challenge that pool owners face is that most consider clear water to equal clean water – and that's not always the case.

Regular maintenance of your pool and its equipment will ensure it's always working at its optimum level. This enables any parts that are failing to be replaced or repaired – before the whole unit requires replacement.

For peace of mind, Donemans Pool Centre offers a home pool maintenance service, which can be as simple or as comprehensive as you like or as your pool requires. Whether it's providing a regular cleaning and maintenance service, a holiday service (to ensure you don't come back to a 'green' pool), or a complete pool and equipment service, we can arrange a maintenance plan to suit your needs.

Our experienced technicians are fully trained to service and maintain all types of pools and spas. In addition to providing regular pool cleaning, installing new equipment and checking existing equipment is operating efficiently and effectively, they can find and fix a range of problems, from algae issues, cloudy water to filtration problems.

We can also advise on the most economical and eco-friendly Products that will ensure your pool / spa is not only running at Peak performance, but also in a way that will save you money and time whilst being kind to the environment. Call us today!

### Product of the Month

#### Instant Filter Klenz

A simple & easy way to ensure you get the best performance out of your pool filter is to "treat" your filter to a regular clean at the start & the end of the swimming season.

Instant Filter Klenz has been designed to be used as part of the regular cleaning routine for all cartridge filters. It quickly removes debris, oils, body fats and dirt utilizing a unique "No Soak" formula to minimize down time of your pool, spa or hot tub.

Do you really want to be swimming in water that is passing through an oily, greasy sludge inside your filter?

Did you know that the sand in your filter needs to be replaced every five years to ensure maximum performance? Over time, the filtration causes water channels to form in the filter sand which means it runs less effectively. There are a number of key processes involved in changing sand, and to ensure peace of mind, our technicians can undertake this for you – and at the same time make sure the rest of the pool is checked and serviced.

## Now is the Time to Renovate

Is your swimming Pool looking tired & outdated? Then it's time to talk to **Donemans Pool Centre**. Our Design Ability & Talent to Visualise the Finished Product, has helped us exceed the expectations of many Happy Customers.

Call for an obligation **FREE** Quotation, you'll be surprised how Inexpensive it can be.

Here's another renovation job we've completed. This pool's vinyl liner interior was well past it's used by date, starting to look old and was coming away from the walls. The owner decided to re-vamp the pool with a new Liner and make it look like new again. Remember NOW is the time to renovate!!!

## MagnaPool Minerals

Transform your pool into a luxurious mineral bath. Specially blended minerals are designed to soften your pool or spa water, for a swimming or bathing experience like no other.

Swimmers can absorb up to 500ml of water in an hour of pool use and the unique blend of Magna Pool Minerals can provide health benefits for the skin, hair, eyes & nervous system and can aid in the reduction of stress, anxiety, aches & pains. Suitable for most Salt Chlorinators, it is easily dissolved in the pool water & its ingredients help prevent calcium and scale build up in the salt chlorinator cell, heaters, pool interior and other equipment

## Save energy, save money

*Clever tips to make your pool more energy efficient*

**SPECK**   
**pumps**

Everyone knows that electricity costs are set to once again go through the roof – and that obviously includes the cost of running a pool. But there are many things you can do to reduce this cost and save yourself hundreds of dollars a year. A top tip is to replace your single speed pump with a multi (or variable) speed pump. They've been engineered to significantly reduce high electricity consumption and CO2 emissions. Eco Touch features superior German technology and is made in Australia to suit Australian conditions.

The 5- star rate Speck Badu Eco Touch Pump has a three speed motor which allows owners to set the pump at a low, energy saving flow rate. The pump uses almost 80% less energy than when operating at a standard high flow rate speed. It won't take long before it well and truly pays for itself.

***Other tips to save money and achieve an energy efficient and eco-friendly pool include:***

- \*Replace halogen lights with LED pool lights:** LED's use 85% less power and have an impressive life span of over 70,000 hours
- \*Use a pool cover:** This will reduce water loss by up to 97% and save up to 50% on heating costs.
- \*Run pool filtration on a timer and reduce running time during winter:** When it's colder there is less chemical demand so less chlorination is required.

## Cool people care for pools

You can do your part for the environment by ensuring you put a **Winter Plan** in place. Correct water treatment over the cooler months will result in a reduced need to perform "chemical dumps" in the summer, meaning less chemicals released into the environment, and reduced water wastage.

Ask our friendly team members for your **Winter Pool Care Plan**.
