Pool Health Check – Test and Balance

If no-one's been in the water since April, then it may not be healthy – and that's not something you want the kids to start splashing around in. **This service involves a check of pool or spa filtration equipment as well as a full water health test by a qualified and experienced pool technician.** If water treatment is needed, then we can provide the right chemicals for you to do it yourself or do the job for you.

Donemans Pool Centre can ensure peace of mind as well as a sparkling pool. **The technician can perform essential maintenance services tailored to the needs of your pool including vacuuming, water balancing and equipment checks.**

Pool/Spa Owners Instruction Service

Those who would like to maintain their pool or spa equipment but aren't sure how to go about it, can learn from the experts. **The Owner Instruction Service teaches householders everything they need to know about their pool or spa and its equipment, including emptying baskets, water balancing and backwashing filters as well as ensuring the ongoing maintenance program is as easy and stress-free as possible.**
